

0.2 ml Thin Wall Tube/Microplate PCR® Workstation

This novel racking system offers multiple choices as to use/storage options, because it comprises two racks with lids, both of which may be used individually or combined as needed. The racks are sold separately and used as required. Holds up to 136 tubes/strips from 0.2 ml to 2.0 ml

0.2ml PCR Satellite Rack with Lid (Rack A)

This 96 place (8 x 12) rack accepts 0.2 ml tubes, 8 or 12 strips and matrix plates for a variety of pre/post PCR sample processing applications and storage down to -80°C. The racks carry standard microplate alpha/numerics for ease of sample identification, have stackable lids and are available in 5 neon colours.

Satellite Rack for 96 x 0.2ml
tubes / strips / microplates

PCR Workstation Rack with lid (Rack B)

This rack accepts the 'Satellite' 96 place 0.2 ml rack which clips onto the workstation (over the existing 0.2 ml holes).
